

Security & Access Controls Overview

Approved security summary for the fictional Kestrel Ridge Knowledge Workspace.

Document control	Value
Reference	KRS-SEC-2026-09
Owner	Information Security
Approved	July 28, 2026
Classification	Approved customer-response source

Approved customer-response source — use the statements in this document as written; do not expand them into unsupported assurances.

1. Access protection

The service supports SAML 2.0 and OpenID Connect single sign-on. Customer administrators assign workspace roles and may disable users or revoke API credentials from the administrative console.

Privileged administrative access is restricted to authorized personnel and is subject to audit logging and periodic access review.

2. Content protection

Control area	Approved statement
In transit	Customer content is protected in transit using TLS 1.2 or higher.
At rest	Production customer content is encrypted at rest using AES-256 encryption.
Auditability	Administrative changes and API credential events are recorded in an audit trail available to authorized workspace administrators.
Vulnerability management	Security findings are triaged under the documented risk-management process and tracked to remediation or accepted risk.
